DETAILED ACTION

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: The prior art fails to disclose a cold cathode type flat panel display which is an image display device having, inter alia, some parts of lines positioned in the **upper layer** out of the plural electrical lines formed on the cathode substrate being made into **scan lines** and lines positioned in the **lower layer** out of the plural electrical lines formed on the cathode substrate being made into **data lines**, and some parts of the electrical lines positioned in the **upper layer** being made into ground lines for giving ground voltage to the spacers, and further the spacers being in a ground state by the ground lines at the least in the **period when the scan lines adjacent thereto are selected** (claim 10); or, lines positioned in the **upper layer** out of the plural electrical lines formed on the cathode substrate being made into **scan lines** and lines positioned in the **lower layer** out of the plural electrical lines formed on the cathode substrate being made into **data lines**, and **some parts of the scan lines positioned in the upper layer functioning both as power feeding lines for giving electric potential to the spacers and scan lines, and being at scan line voltage at the least in the period when the parts of the scan lines are selected** (claim 15). The remaining claims 11-14 and 16-20 are allowed by virtue of their dependencies on the independent claims. Hence, the examiner has allowed claims 10 through 20.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Sagawa et al., Patent No. 6,873,115 ; Kuroda et al., Patent No. 6,366,014.

None of the above patents discloses the cold cathode type flat panel display as recited.
